

Changelog yuuviz RAD 7.2

Schlüssel	Komponente (n)	Zusammenfassung	Beschreibung
COOL-14900	yuuviz RAD core-service	Support for monitoring the file IO operation durations	<p>As an administrator, I want to be supported by monitoring the file IO operation durations so that I can find performance bottlenecks.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• REST-WS interface is extended with a list of IO file operation durations <p>http://kolibripliant.optimal-systems.de:8080/rest-ws/#PAGE:monitor/statistics</p>
ERA-7738	yuuviz RAD core-service, yuuviz RAD designer	Priority of processes is no longer supported	<p>As a modeler of workflow models, I would like to be offered only with options that are fully supported in the whole system, in order to have a focused modelling tools. Since only a small part of system supports process-priorization, I would like to have it removed from models and tooling.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• Performance setting is removed from designer• Performance setting is removed from existing models<ul style="list-style-type: none">• The property remains in existent models (no update step)• However, the property is ignored when writing/reading model XML, thus on long term it will be removed from models• Property is ignored both in designer and in the backend• Code that handles performance settings in backend is removed
