

Changelog yuuvvis RAD 7.6

Schlüssel	Komponente(n)	Zusammenfassung	Beschreibung
COOL-14808	yuuvvis RAD client, yuuvvis RAD core-service	Users can decide whether to get a notification for metadata or for document file change during abonement creation	<p>As a user, I would like to be able to choose whether I want to be informed about changes to the metadata or the document file when I create a subscription.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• The REST endpoint is extended to differentiate between both types of infos.• The dialog for creating and updating an abo offers a checkbox for selecting one or both types of infos. Default is both. It is not possible to uncheck both boxes.• Nice to have: The notification tells about the type of change.
COOL-14985	yuuvvis RAD core-service, yuuvvis RAD management-studio	You are supported by a configurable object delete operation	<p>As an administrator, I want to be able to schedule a delete operation with an ESQL statement that specifies the objects to be deleted so that obsolete objects can be removed with respect to compliance requirements.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• The management studio offers a delete operation that allows defining an ESQL statement.<ul style="list-style-type: none">• EN: "Delete objects"• DE: "Objekte löschen"• There is a report that lists the IDs of the deleted objects.
COOL-14989	yuuvvis RAD client	The default for filtering columns of type string is changed from equal to contains	<p>As a user, I want to have the filtering of columns of type string with the default 'contains' because this is more powerful.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• The default for filtering columns of type string is changed from equal to contains
COOL-15059	yuuvvis RAD client	The security dialog for deletion informs about the active retention and does not allow to delete the object in this case	<p>As a user, I want not to be allowed to delete an object if this is under retention and getting an error message about the resulting conflict.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• The delete action checks whether a retention time is given: the latest retention time in the permanence array is taken.• If a retention time is given and the recycle bin capability is not enabled the user is informed and the deletion is not offered:<ul style="list-style-type: none">• EN: "This object can not be deleted before <retention date>."• DE: "Dieses Objekt kann bis einschließlich <Aufbewahrungszeit> nicht gelöscht werden."
COOL-15133	yuuvvis RAD core-service	The REST-WS endpoint getItemAudit offers a list of all history entry types	<p>As a programmer, I want to be supported by a list of all DMS history entry codes and a meaning so that I can handle other localizations.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• The list is offered on the REST-WS page for this endpoint and offers the columns for the keys and a short description in English.<ul style="list-style-type: none">• Hovering over the short description shows up the description

COOL-15136	yuvis RAD search-service	You are supported by fuzzy search	<p>As a user, I want to be supported by the fuzzy search so that I can mistype my search term but getting the wished objects although.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none"> • This feature can be switched on and of via server-side configuration, the default is false: <ul style="list-style-type: none"> • to be configured in search-prod.yml • If this feature is activated search terms can be mistyped but found although. • Scope: no further configurations for the fuzzy behavior yet • There is a digest informing about the fuzzy search capability and the restrictions using it: <ul style="list-style-type: none"> • The fuzzy search will find more relevant objects. • The combination "term1 term2" does not support the full-text search to find term1 in the metadata and term 2 in the content. Only objects are found if both terms are in one metadata field • E-mail addresses can not be found that are separated by a colon.
COOL-15154	yuvis RAD client	The BPM process file can be forced to be refreshed	<p>As a programmer, I want to be able to force the BPM process file to be reloaded from within a BPM task container if my business logic added not objects to the process file so the user can see them.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none"> • There is an event trigger that allows loading the process file list with the currently added objects. • There is a custom action example that is documented.
COOL-15177	yuvis RAD core-service, yuvis RAD management-studio	The report of the object delete operation shows the detailed error message	<p>As an administrator, I will see existing error information within the operation report, so that I do not have to open the REST-WS monitor as well.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none"> • During the "Delete Object Operation" error messages are collected. • The error message is listed in the management studio <ul style="list-style-type: none"> • The string fields can show the complete error message (line break)
