

Changelog yuuvvis RAD 8.14

Schlüssel	Zusammenfassung	Beschreibung
ERA-8655	Start and stop of the LDAP-Sync operation is logged	<p>As an operator of a system, I would like to track the changes to organisation- and rights-system of a yuuvvis RAD installation, in order to know what or who has made changes.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• Start of LDAP-Sync operation is logged in the security-system-changelog• End of LDAP-Sync operation is logged in the security-system-changelog
ERA-8885	Administrator can unclaim tasks of a user	<p>As an administrator I would like to be able to return all claimed tasks of a user (for instance due to user's absence, or for any other reason), so that other colleagues can claim them and work on them.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• Administrator with functional right <code>MANAGE_PROCESSES</code> can return all claimed tasks of a user <p>Technical details:</p> <ul style="list-style-type: none">• management studio request for changing of user data is <code>POST /rest-ws/service/organization/update/userid</code>• we will create a new internal endpoint that only unclaims the tasks, and it can be triggered independently from user-status change. <code>DELETE bpm/process/activitylocks?userId=id</code> (probably "personalizerId"; probably extended by filter parameters like in <code>DELETE bpm/process</code>)• it returns list of tasks that were depersonalized
OKTO-5405	Support for ranging for the document viewer when delivering PDFs in yuuvvis RAD	<p>As a developer, I would like to fetch PDF documents from the document viewer with the ranging attribute to be able to support viewers that only need parts of the document.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• The interfaces for fetching the individual renditions support the request and delivery of documents with ranging via the standard headers (https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Range)• The feature is tested
TUK-912	The OCR Service is based on Finereader 12	<p>As the system responsible, I want the OCR-service based on Finereader 12 so that we can get support for this.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• The Finereader library is updated to version 12• The code is adopted with respect to changed licensing.
TUK-1363	The agent is not popping up after the workstation has been reactivated and if the login was successful	<p>As a user, after reactivating the workstation, I want the login dialog only to be shown if the login was not possible so that I do not have to close the window every time.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• After starting the agent no dialog is shown, only if the user has to enter his credentials again.
TUK-1372	A programmer gets the deputies of a user as well when calling the REST-WS endpoint <code>getOrganizationObjectById/getOrganizationObjectByName</code>	<p>As a programmer, I want to be able to get the substitutes of a user as well when calling the REST-WS endpoint <code>getOrganizationObjectById</code> so that I can reduce my calls.</p> <p>Acceptance criteria:</p> <ul style="list-style-type: none">• The endpoint <code>getOrganizationObjectById</code> and <code>getOrganizationObjectByName</code> offers another parameter 'deputies' that offers the list of substitutes of the given user if set to true.

TUK-1388 The client and management studio ng supports the language Hebrew (he) like Arabic (ar) as Beta-Version

As the system responsible, I want the client to be prepared for the language Hebrew so that it is possible to test the application using this language including the right-to-left mode.

Acceptance criteria:

- Hebrew is part of the client source: Dates including its picker and decimals are formatted well.

TUK-1408 The change of a column width of a form table is remembered

As a user, I want that my changes to a form table are remembered so that I do not have to change it every time.

Acceptance criteria:

- The changes of the table form column width are remembered in a similar way as for result lists. The setting for the edit dialog is saved separately.
