

Bugfixlog yuuviz RAD 9.0

Schlüssel	Zusammenfassung	Support Calls
DB-6806	The designer does not validate missing classification targets	
DB-6878	Operation can no longer be edited or deleted in Management Studio if the title contains forward slashes (/)	00045966
DB-6947	Custom clients can no more be built due to broken internal imports of the core library	
DB-7011	Changes to localisations of form-objects are not saveable	
DB-7056	It is possible to confirm a follow-up if its date was changed although is has been reached	
ERA-8888	API endpoints should return consistent and correct error codes	
ERA-8889	API endpoints should return 200 with empty list instead of 204 NO CONTENT	
ERA-9122	The designer cannot show unresolved classification targets	
ERA-9147	Creating or updating a process file with nonexistent object type name returns a 404 but file is still created / updated	
ERA-9169	Correct example and schema for createUser / createGroup	
ERA-9178	Title bar actions "Move" and "Size" are not localized and have no icon	
ERA-9185	404 on newly created process	
ERA-9223	Changes to localisations of form groups are not saveable	
ERA-9231	HTTP-Calls from script with whitespaces in URL ends up in an error	
ERA-9241	When removing languages from the schema localizations of form elements of unaffected languages get deleted	
ERA-9242	Save button stay grey-out even changes has made	
ERA-9243	Tool tips for some object type rights are missing	
ERA-9244	After copying an object type group with multiple object types the "Save" button does not seem to save everything	
ERA-9254	New item's title not marked and ready to edit upon creation	
ERA-9261	It is possible to confirm a follow-up if its date was changed although is has been reached	
ERA-9273	About dialog of designer shrinks depending on the current screen's resolution	
ERA-9287	Endpoint for getting the history entries of a process is not working correctly when setting a period ID	
ERA-9293	No values for "Default" dropdown list	
ERA-9302	When creating / updating a project or model info, not supported properties are ignored	
ERA-9303	Improve response when resuming / suspending / terminating one single process	
ERA-9313	Catalog and Counter can not be created	
ERA-9316	Validation of the classification property has errors	
TUK-1520	The indexservice fails to index objects if clauses in roles contain invalid fields	
TUK-1603	Closing suggestion list with ESC doesn't remove the typed value	
TUK-1617	Missing message info in reindex when nothing happened	
TUK-1621	The reindex process from Elasticsearch 7.9.3 to 7.16.2 is erroneous	
TUK-1669	Taskkill on Out-Of-Memory is not working correctly	
TUK-1671	Content preview is missing in table	
TUK-1757	The toggling of the preview area in the edit form table dialog is not effective if the row edit area is closed	

TUK-1766	The undock icon is offered in the edit form table but should not	
TUK-1768	Removing details from history aspect area is irreversible	
TUK-1769	Operation can no longer be edited or deleted in management studio if the title contains forward slashes (/)	00045966
TUK-1774	In this case of msg-files, the extraction parameter OS.FileName is not correct	
TUK-1791	Wrong labels in email templates for follow-ups and subscriptions	
TUK-1816	The synchronize storage operation fails if the source medium contains zipped nodes	
TUK-1817	Searching for 0 or 0.0 in number fields returns an incorrect hit list	00046296
TUK-1818	Small issue with read-after creation field	
TUK-1822	White space in process overlay	
TUK-1823	The service-manager setup does not add core-service hostnames to the ip filter exceptions	
TUK-1832	Inbox task details shows the process name instead of the subject as subtitle	
TUK-1835	Files of type mimetype application/x-typescript with extension ts are determined as octet-stream but should be assigned to group Text as well	
TUK-1836	The gateway ignores X-Forwarded-* headers	
TUK-1837	The service-manager cannot determine performance counters on systems with changed language settings	
TUK-1838	The core-service operation report generation produces a stackoverflow exception	
TUK-1847	In this case of a filtered inbox and after a forward, the task details keep staying	
TUK-1862	The highlighting of the search term in the PDF viewer is not directly shown	
TUK-1872	The endpoint getItemChildren fails on systems with postgres database	
TUK-1875	Client remember show content button in table	
TUK-1878	One empty result in list	
TUK-1923	Custom clients can no more be build due to broken internal imports of the core library	
TUK-1938	'No value' is shown in an empty string cell of a table in the BPM startform	
TUK-1959	In the reference selection dialog, after removing an entered search term the usual search results are not displayed again	
TUK-1961	After saving a search with a dynamic field no warning is given that this type of property can not be used in saved searches	
TUK-1962	Trusted IP pattern is not recognized in dms-sidecar and rendition-sidecar	
TUK-1972	Agentsservice doesn't startup in version 9.0	
TUK-2033	Log-Level of index-service is on TRACE per default	
TUK-2034	The index-service fails to index new objects until a restart is done	
TUK-2035	Extraction-Service initially fails to extract metadata of a batch-import but the following ones succeed	
TUK-2041	Wrong color for non-checked and focused checkboxes in the inbox filter	
TUK-2047	Obsolete messaging queues are still configured	
TUK-2114	Read only field act like is writable	
TUK-2117	Wrong Maus arrow	
TUK-2120	Form scripts in client do not handle a configured context path	
TUK-2121	Metadata field with dynamic list is displayed empty even if there is a value in DB when the list has no entries	00048055
TUK-2128	Fix CRITICAL CVE-2019-10202, CVE-2017-1000190	
TUK-2138	New search title not marked and ready to edit upon creation	
TUK-2140	In the search dialog, the operators for datetime controls don't look like buttons	
TUK-2152	Extractionsservice gets errors during processing recipients of e-mail	

TUK-2153	After switching to OAuth2 authorization the list of recently edit objects is missing on the dashboard	00048595
TUK-2155	The entry pattern is shown for an empty read-only datetime field	
TUK-2160	It is not possibel to copy a folder and to paste it into a process file	
TUK-2163	It is not possible to navigate through the main menu by cursor up and down	
TUK-2171	Right click on object shifts client upwards	00048764
TUK-2172	Wrong highlighting parameter causes BAD REQUEST error on reference field	
TUK-2178	Security issue with Apache CXF3.2.7: CVE-2022-46364 & CVE-2019-12419	
TUK-2184	In a form, the input area for multi-value fields is too small	
TUK-2187	Missing public documentation for unattended core-service installation	
TUK-2190	Missing log output in indexservice concerning the change of camel route status	
TUK-2191	Form titles and values of read-only fields are hardly readable due to low contrast	
TUK-2204	In a BPM start form, the entered values from multi-value fields are not converted to chips if the field is left by tab or click	
TUK-2213	The "Include documents" checkbox within the sharing function is always set/always displayed	
TUK-2222	Pushing the object action 'Share' runs the first time in an error that is not reported to the user	
TUK-2225	Catalog entries are not hidden but grayed out in the create and edit situation	
TUK-2239	Returning to the inbox is no more focusing the last focused task	
TUK-2249	No retry-strategy on start-route of the index-service	
TUK-2264	The list of globally startable processes contains invalid items	
TUK-2278	Missing product version in client	
TUK-2284	Client ignores agent settings and locks item anyway	
TUK-2293	Missing viewer service keys in the client localization files	
TUK-2322	Revert fix TUK-1961: After saving a search with a dynamic field no warning is given that this type of property can not be used in saved searches
